Subject: City of Santa Clara Urban Runoff Management Program
FY 2009–2010 Annual Report

Dear Mr. Wolfe:

This report is submitted by City of Santa Clara in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.16 of the Program's municipal stormwater NPDES Permit (Order No. R2-2009-0074). The report summarizes activities performed during FY 2009-2010 in accordance with requirements set forth in the municipal regional stormwater NPDES Permit.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of the municipal regional stormwater NPDES Permit for FY 09-10 and 2) evaluate program results for continuous improvement. The FY 2009-10 Annual Report contains the following sections:

- Certification Statement
- Municipal Operations (C.2)
- New Development and Redevelopment (C.3)
- Industrial and Commercial Site Controls (C.4)
- Illicit Discharge Detection and Elimination (C.5)
- Site Control (C.6)
- Public Information and Outreach (C.7)
- Water Quality Monitoring (C.8)
- Pesticides Toxicity Control (C.9)
- Trash Load Reduction (C.10)
- Mercury Controls (C.11)
- Polychlorinated Biphenyls (PCB's) Controls (C.12)
- Copper Controls (C.13)
- Polybrominated Diphenyl Ethers (PBDE), Legacy Pesticides and Selenium (C.14)
- Exempted and Conditionally Exempted Discharges (C.15)

Program Summary

The City of Santa Clara has been active in the Program elements and very active at the Co-permittee element level. The City successfully implemented all of the provisions of the permit that were required to be completed by the end of FY 2009-10.

Unfortunately, the City of Santa Clara is challenged with similar fiscal and staffing restraints as other public agencies during this down economy. As you know, the City's Urban Run-Off Management Program has been tasked to do significant additional work, with less financial and staffing resources. As such, the City reprioritized its efforts to focus on construction site inspections and the most significant industrial facility inspections.

Because of the resource constraints and the other demands placed on the City by the MRP, in FY 2010-11 the City will re-evaluate balancing the number of industrial/commercial inspections and construction site inspections against other MRP demands. The City is currently evaluating how to address the resource shortfall with the goal of full cost recovery for the stormwater program. In this regard, preliminary estimates indicate that the current stormwater fees would need to be increased by a factor of 30 to achieve this goal, via a Proposition 218 ballot initiative process that would require a 2/3 majority vote.

The City continues to retain EOA Inc. to assist with the planning and implementation of the C.3. Provisions. The assistance provided by EOA has been valuable in supporting staff on site specific C.3. Provision questions.

Thank you for your review of this FY 09-10 Annual Report. If you have any questions regarding the materials submitted, please contact Dave Staub at 408-615-3086.

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

The City of Santa Clara completed the inventory of storm pump stations by March 1, 2010. All City corporation yards were inspected in FY 09-10, and all have SWPPP's in place. The City participated in the Program's Municipal Operations Ad Hoc Task Group (AHTG), which has developed pump station sampling guidance. Refer to the C.2 Municipal Operations section of the Program's FY 09-10 Annual Report for a description of the AHTG activities.

C.2.e. ► Rural Public Works Construction and Maintenance

Does your municipality own/maintain rural² roads:

Yes

No

If your answer is **No** then skip to **C.2.f.**

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas
	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources
	No impact to creek functions including migratory fish passage during construction of roads and culverts
	Inspection of rural roads for structural integrity and prevention of impact on water quality
	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion
	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate
	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings

Comments including listing increased maintenance in priority areas:

² Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation

Place an **X** in the boxes below that apply to your corporation yard(s):

<input type="checkbox"/>	We do not have a corporation yard

Comments:

Street Corporation Yard has temporarily discontinued vehicle washing activities because its system previously discharged wash water that went through a series of treatments to the stormdrain system. A new washout station is under construction and projected to be complete and operational in August/September of 2010.

C.3.b.v.(1) ► Regulated Projects Reporting Table

Fill in attached table C.3.b.v.(1) or attach your own table including the same information

C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

- (1) Fill in attached table **C.3.h.iv.(1)** or attach your own table including the same information
- (2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.
- Summary: This was the first year that the City inspected installed treatment systems. We encountered no difficulty with specific treatment systems. The problem we encountered was the failure of the developer to notify the property owner that the treatment measures were installed. In every instance the property owner was issued a Notice of Violation for failure to maintain the installed treatment systems.
- (3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).
- Summary: The Planning Department requires applicants to execute a Stormwater Treatment Measure Inspection and Maintenance Agreement before signing off on a project. The executed agreement is then turned over to the Street Department for inspection one year after installation. We are now advising developers that they need to convey the need for ongoing maintenance of stormwater treatment to property owners upon completion of the project. The number of sites to inspect is still small, so the City plans to inspect each site once a year until the number of sites grows to a number that makes doing so no longer practicable, assuming staffing levels do not grow.

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

The quantity of IND/COM facility inspections dropped from 920 in FY 08-09 to 23 in FY 09-10. The primary reason for this precipitous decrease was the reallocation of Stormwater Inspector time to comply with other new MRP mandates, which took the primary focus away from IND/COM facility inspections. Due to fiscal/budgetary constraints, the City was not able to bring on an as-needed inspector to beef up the IND/COM facility inspection program. Staff forecasts the number of IND/COM facilities that are inspected during a given year will remain at a lower level than in the past because staff must spend time implementing other provisions of the MRP.

Inspections for FY 09-10 were geared mostly towards construction and IC/ID response. IND/COM facility inspections encompassed only mandatory NOI filers in FY 09-10 plus 2 manufacturing facilities which do not have NOI's. IND/COM lists are updated every year. The permitted facilities are updated using the Water Board's website and the non permitted facilities are updated using the City's Business Licenses software.

IND/COM inspector conducts training for the various departments in the City and will continue to conduct training in FY 10-11 to keep City facilities in compliance. Inspector attends training when provided by EOA. The City's Stormwater Inspector attends the IND/IDEE Ad Hoc Task Group meetings on a regular basis and will continue to attend in FY 10-11. Refer to the C.4 IND/COM site controls section of the Program's FY 09-10 Annual Report for a description of activities of the IND/COM AHTG and the BASMAA Municipal Operations Committee.

C.4.b.i. ► Business Inspection Plan

(For FY 09-10 Annual Report only) Do you have a Business Inspection Plan?

Yes No

City of Santa Clara Business Inspection Plan

NOI Filers	Annual	Auto Wreckers Sites with violations the previous inspection
Other NOI Filers	2-3 years	No violations during previous 2 inspections
Non NOI Filers	5 years	Restaurants Machine Shops/Sheet Metal Auto Repair Printing/Photo Dry Cleaners Printing Car Wash

If Violations are found re-inspections are conducted within 10 days. If violation(s) are not corrected within 10 days, escalating enforcement action takes place.

C.4.b.iii.(1) ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

See attached list labeled C.4.b.iii (1) City of Santa Clara Potential Facilities List

C.4.b.iii.(2) ► Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

See attached lists labeled C.4.b.iii. (2) - City of Santa Clara Food Facilities List (goal of 30% to be inspected)
C.4.b.iii. (2) - City of Santa Clara Active Industrial NOI Filers (all to be inspected)

C.4.c.iii.(1) ► Facility Inspections

Fill out the following table or attach a summary of the following information.

	Number	Percent
Number of businesses inspected (if known)	23	
Total number of inspections conducted	23	
Violations issued (excluding verbal warnings)	9	
Sites inspected in violation	7	30%
Violations ¹ resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	9	100%

¹ Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.4.c.iii.(2) ► Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. non-stormwater discharge)	0
Potential discharge (e.g. BMPs not in place or ineffective)	9

C.4.c.iii.(2) ► Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP) ¹	Number of Enforcement Actions Taken	% of Enforcement Actions Taken ²
Level 1- Violation Notice	7	7	100%
Level 2- Pre-Citation	0	0	0
Level 3- Citation	0	0	0
Level 4 – Further Citations – Attorney notified	0	0	0
Total	7	7	100%

Notes:

¹Agencies to list specific enforcement actions as defined in their ERPs.

²Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.4.c.iii.(3) ► Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category ¹	Actual Discharge Violations	Potential Discharge Violations
7 – Machine Shops	0	2
8 – Metal Manufacturing	0	1
9 – Electric/Electric Components	0	2
11 – Local Highway Transit	0	2
14 – Concrete, Clay, Stone Products	0	1
17 - Other	0	1

Notes:

¹ List your Program's standard business categories.

C.4.c.iii.(4) ► Non-Filers

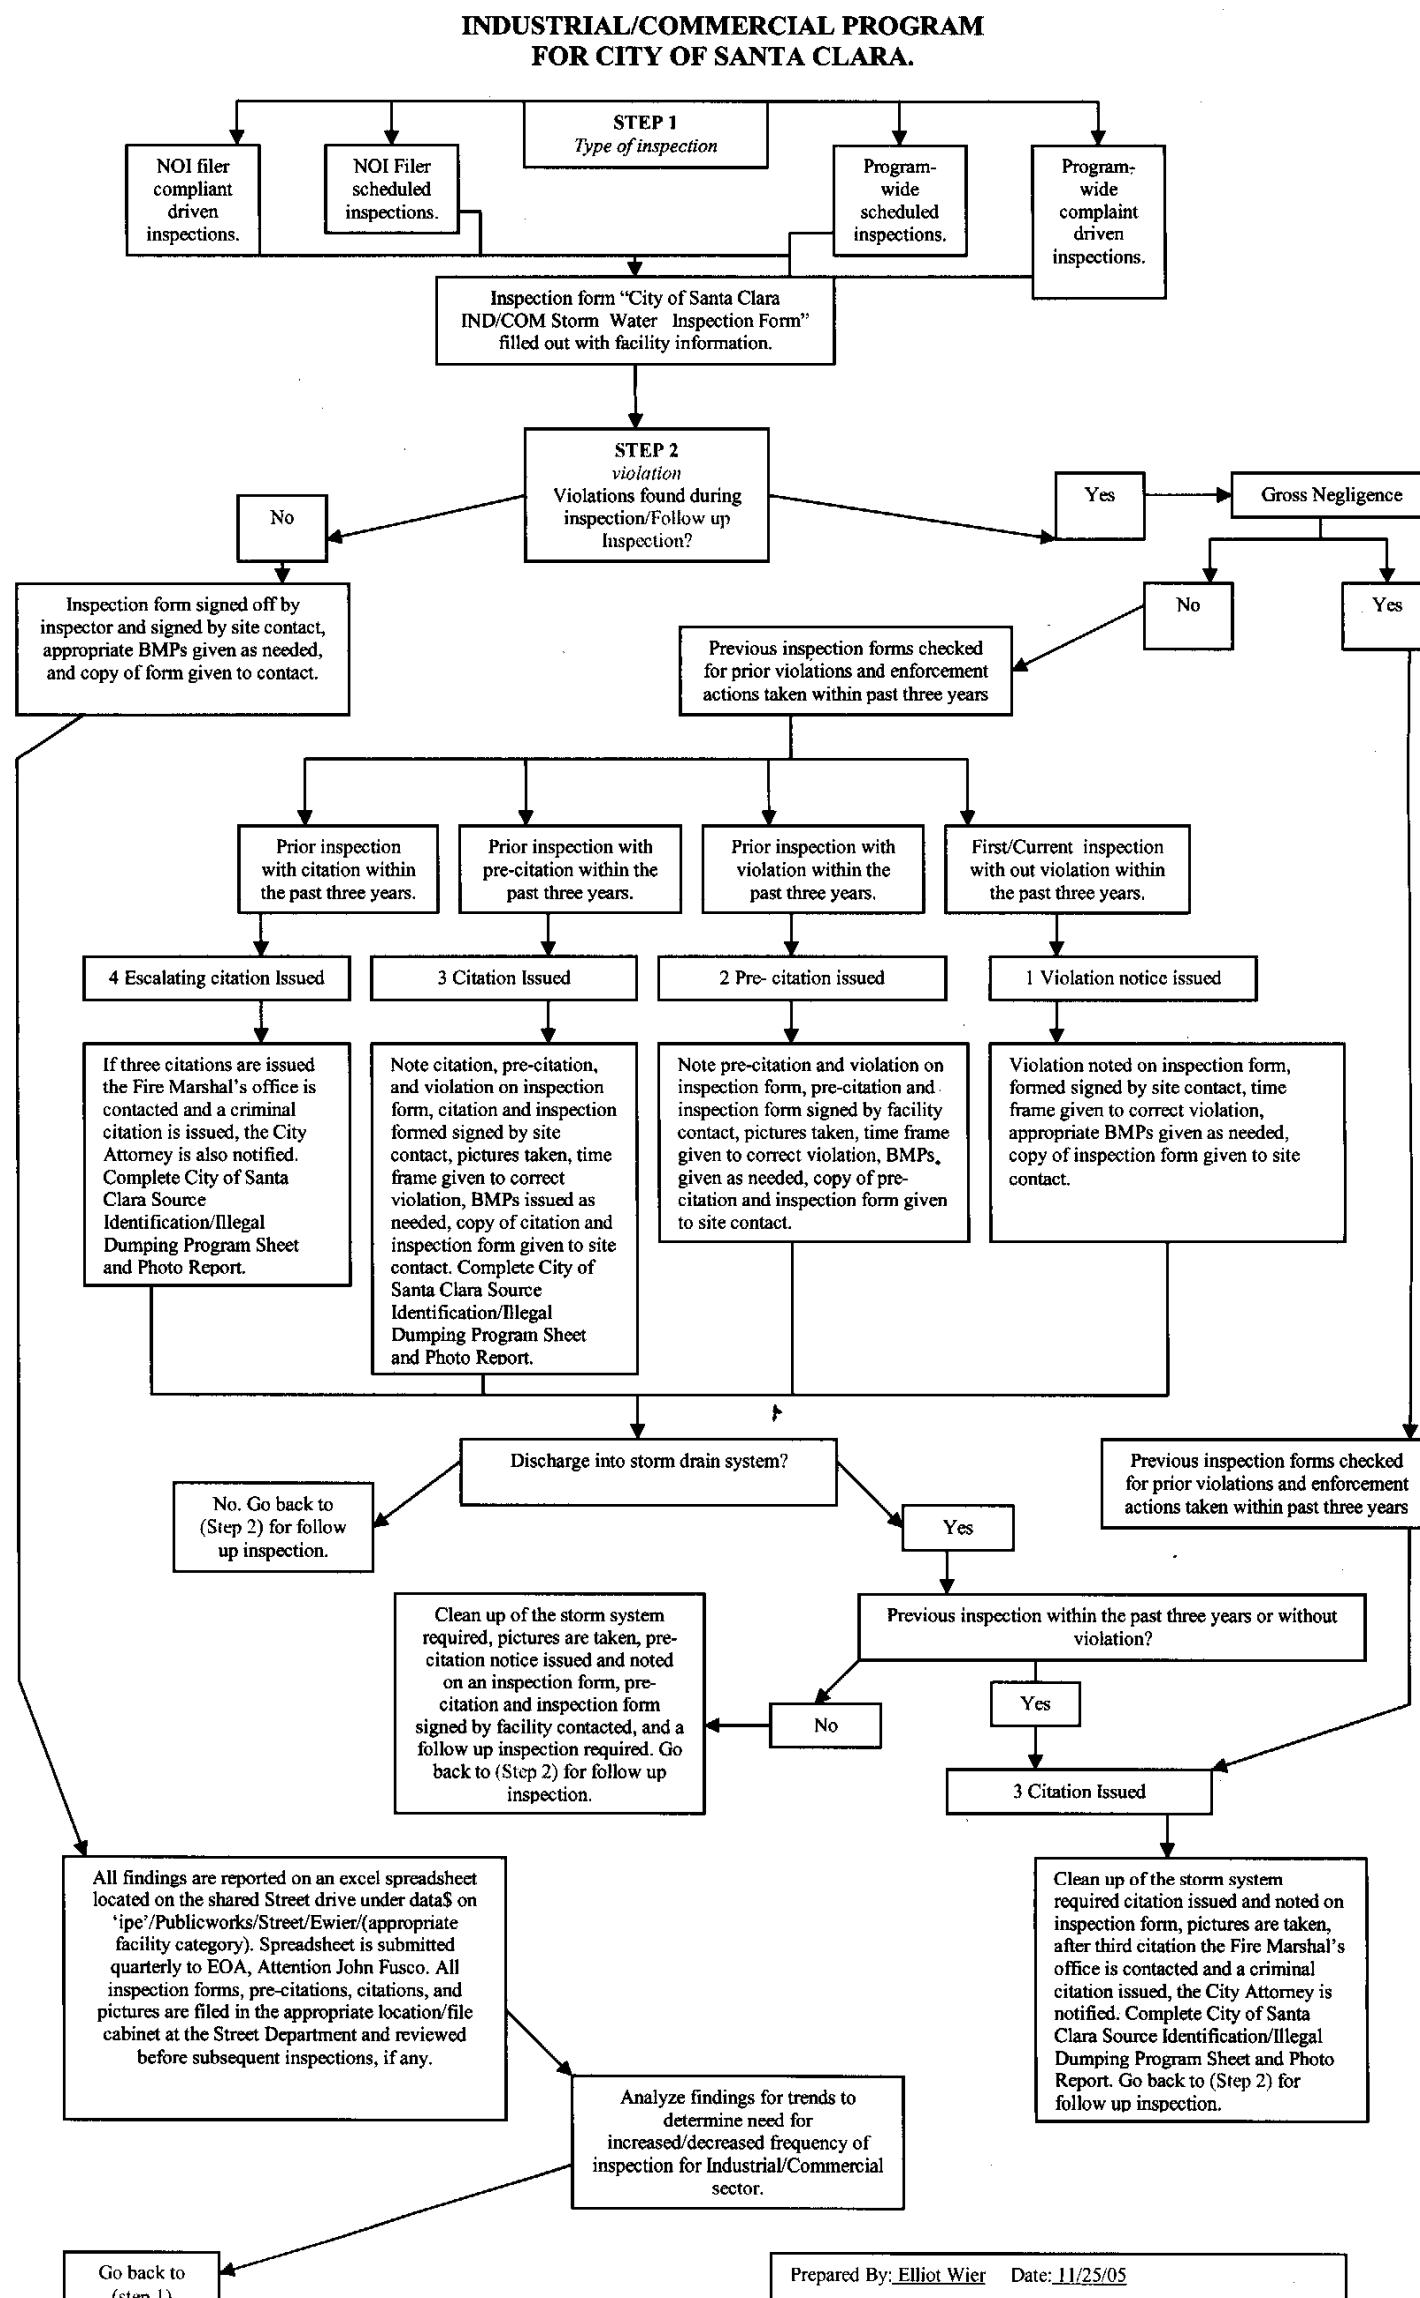

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

There were no industries identified as non-filers during scheduled inspections during the fiscal year.

C.5.d.iii ► Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description:

The City of Santa Clara responds to mobile surface cleaners on a complaint driven basis. BMPs are provided to mobile businesses, as applicable. Appropriate enforcement action is taken when violations are found. The City of Santa Clara follows the BMPs recommended by the BASMAA Mobile Surface Cleaner's Program regarding mobile surface cleaners when needed.

Refer to the C.5 Illicit Discharge Detection and Elimination section of the Program's FY 09-10 Annual Report for a description of efforts by the IND/IDDE AHTG and the BASMAA Municipal Operators Committee to address mobile businesses.

C.5.e.iii ► Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description:

In FY 10-11 the City implemented a recording form to keep records of all incoming complaints to meet the collection screening program requirements. Also in FY 10-11 all verbal notices will be recorded with a violation or correction notice and documented with this new recording form. This will help keep records of complaints that end up not being violations and also eliminated verbal warnings to more efficiently track inspector responses.

Refer to the C.5 Illicit Discharge Detection and Elimination section of the Program's FY 09-10 Annual Report for a description of efforts by the IND/IDDE AHTG and the BASMAA Municipal Operators Committee to develop collection system screening program guidance.

C.6.e.iii.1.a, b, c ► Site/Inspection Totals

Number of sites disturbing < 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (C.6.e.iii.1.c)

C.6.e.iii.1.d ► Construction Activities Storm Water Violations

BMP Category	Number of Violations ¹	% of Total Violations ²
Erosion Control	0	0
Run-on and Run-off Control	3	23.07
Sediment Control	2	15.38
Active Treatment Systems	1	7.69
Good Site Management	7	53.84
Non Stormwater Management	0	0
Total	13	100%

Notes:

¹Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category.

²Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

C.6.e.iii.1.e ► Construction related storm water enforcement actions

	Enforcement Action (as listed in ERP) ¹	Number Enforcement Actions Taken	% Enforcement Actions Taken ²
Level 1 No Action	0	0	0
Level 2 Violation Notice	4	4	80
Level 3 Pre-Citation	1	1	20
Level 4 Citation	0	0	0

²Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.6.e.iii.1.f, g ► Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	0

C.6.e.iii.1.h, i ► Violation Correction Times

	Number	Percent
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	8	61.5% ²
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	5	38.5% ³
Total number of violations for the reporting year¹	13	100%

Notes:

¹Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

²Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

³Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

C.6.e.iii.(2) ► Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:

Our forms covered the BMP Categories well. New Forms will be in development to better fit the BMP criteria. All inspections were tracked using an excel spreadsheet and covered all data needed for the entire fiscal year.

C.6.e.iii.(2) ► Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

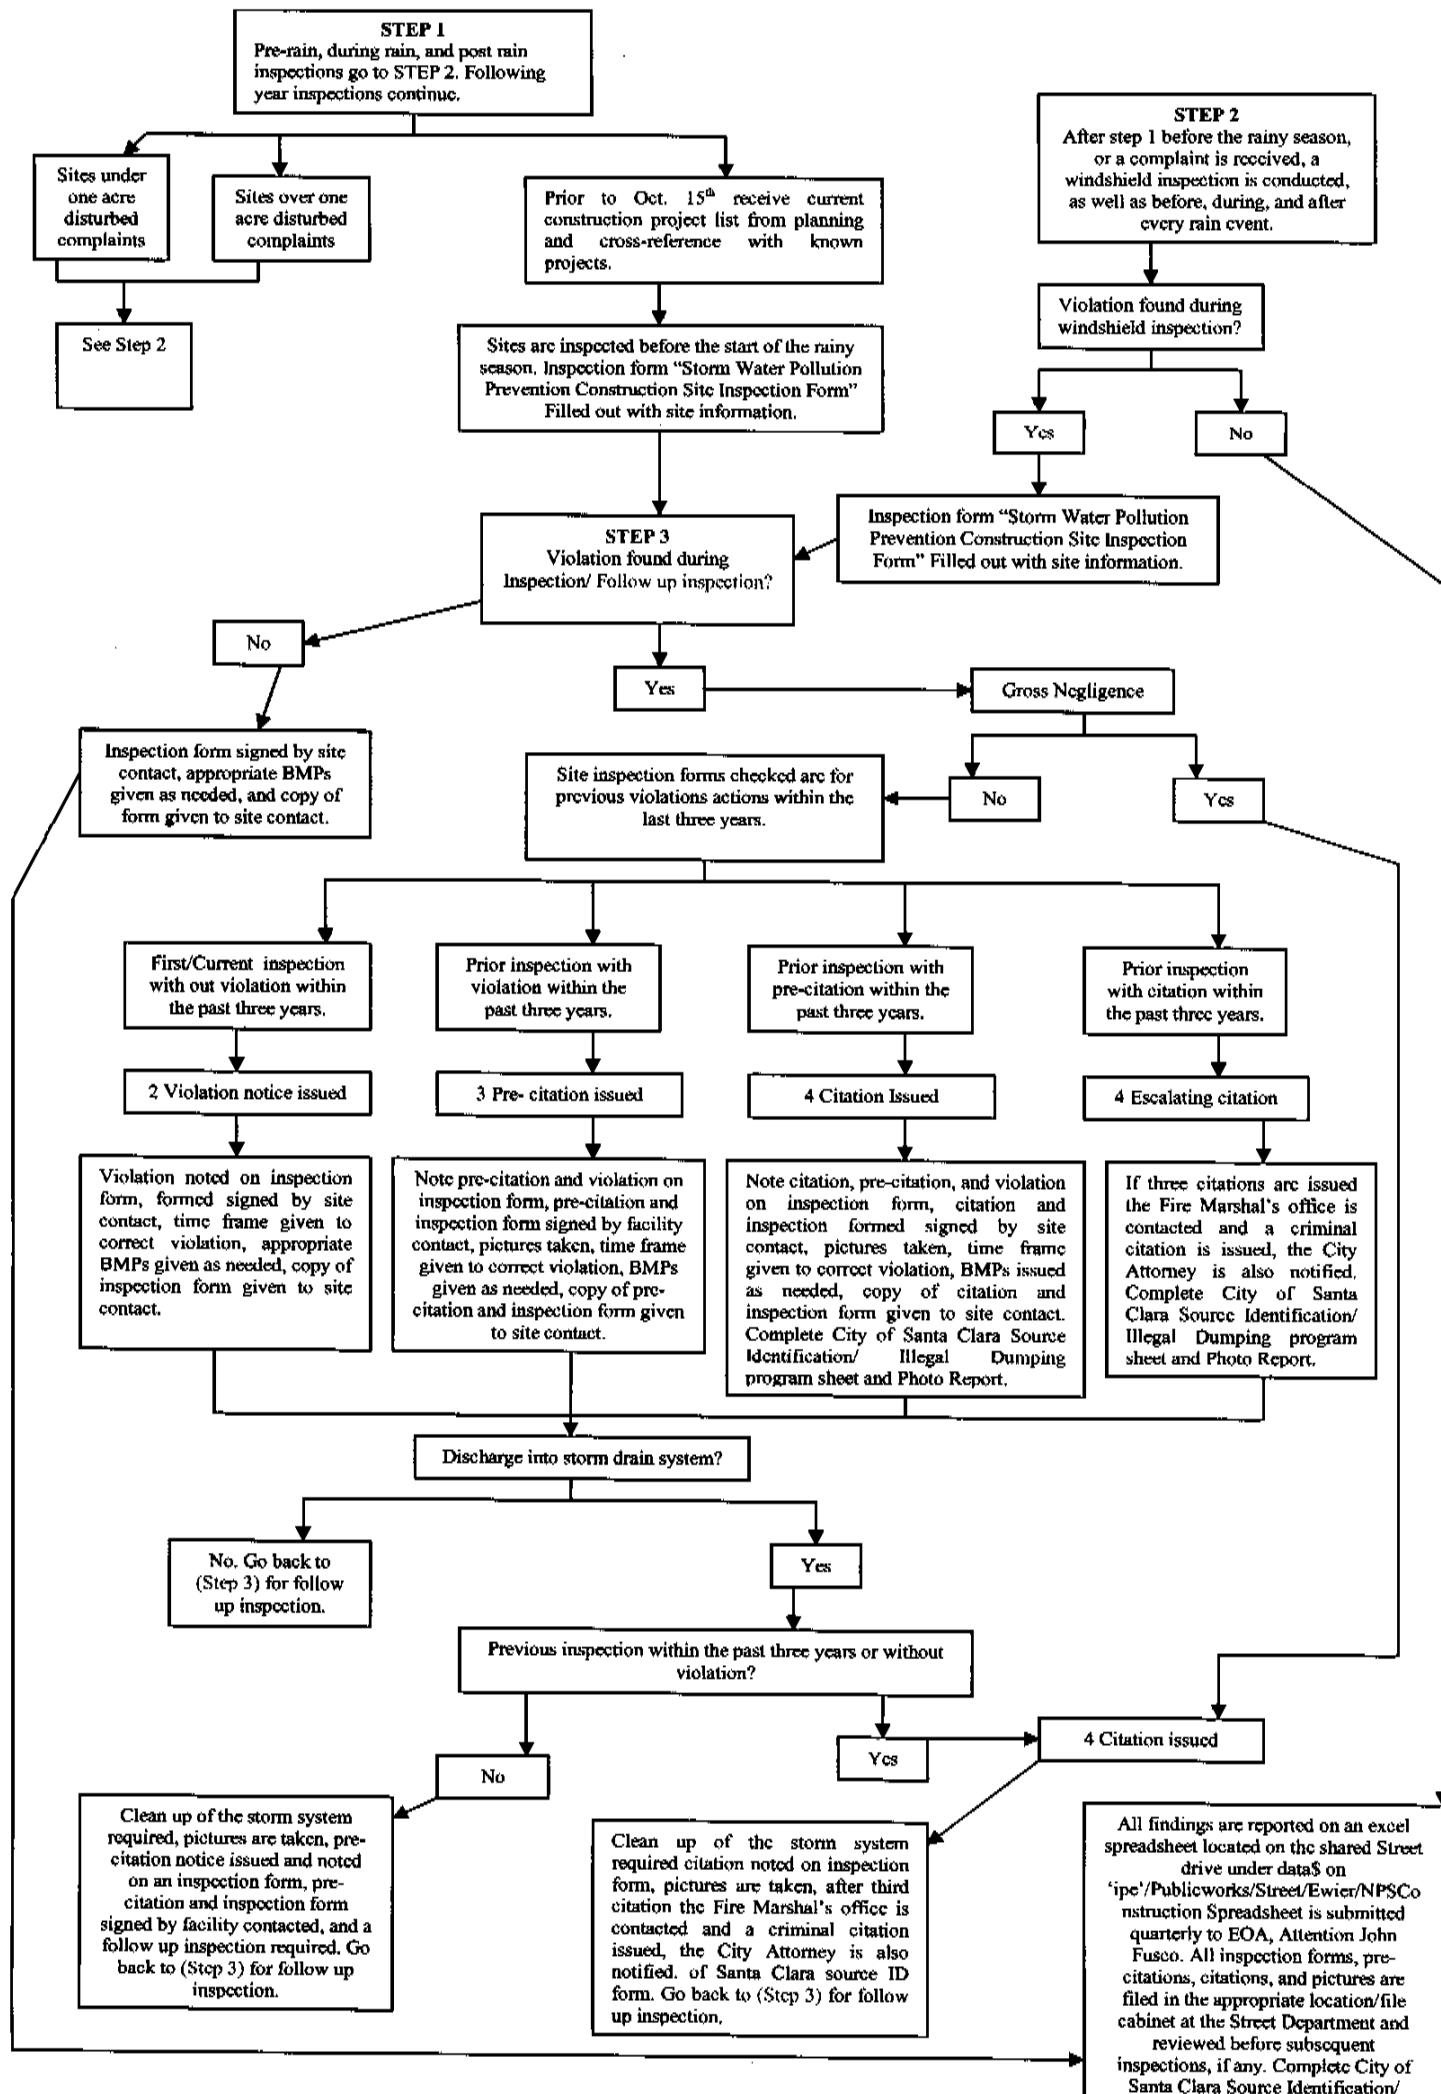

The Stormwater Construction Inspection Form effectively tracks BMP category requirements. The Stormwater Inspector has been trained to use the inspection form and new inspection tracking tools. The Stormwater Inspector participated in the Program's Construction AHTG, which created a template construction inspection form, an inspection data tracking spreadsheet, and guidance for identifying high priority sites. The total number of construction site inspections remained high in FY 09-10. The quantity of construction site inspections will decrease significantly in FY 10-11 due to City budgetary constraints and the diversion of Stormwater Inspector time to address other new requirements in the MRP.

C.8 ▶ Water Quality Monitoring

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

Summary:

During FY 09-10, we contributed to the SCVURPPP Monitoring and Assessment Program which conducts water quality monitoring in Santa Clara Valley creeks and rivers. In coordination with the BASMAA Regional Monitoring Coalition (RMC). In addition, we contribute financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and actively participate in RMP committees and work groups. For additional information on monitoring activities conducted by SCVURPPP, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 09-10 Annual Report.

In addition, The City of Santa Clara and City of San Jose prepared and submitted a joint Stormwater Pump Station Discharge Monitoring Report to the SFRWQB in June 2010. The City was required to conduct two dry weather and three wet weather monitoring events at the Laurelwood, Fairway Glen, and Nelo-Victor Stormwater Pumpstations as a result of a fish kill in The Guadalupe River in October of 2008.

Pumpstation discharges were monitored for biochemical oxygen demand (BOD), total suspended solids (TSS), total coliform organisms, pH, salinity, dissolved oxygen, and temperature.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a ► Adopt an Integrated Pest Management (IPM) Policy or Ordinance

(For FY 09-10 Annual Report only) Attach a copy of your individual IPM ordinance or policy.

Attached

Not attached, explain below

If **Not attached**, explain:

C.9.b ► Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphorous pesticides, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Summary:

For FY 09-10 we continued to evaluate our IPM procedures and pesticides. Of the pesticides we have used in the past, we continued to either not use or minimize many of these pesticides (see attached usage report). Organophosphorus, pyrethroids, carbaryl, and fipronil pesticides are not applied due to the risk of ground water contamination. Due to the length and volume of rainfall this season, we saw an increase in Round Up usage. We also saw a significant decrease in our pre-emergent use this year. We have been expanding our mulch program every year, and this has allowed us to decrease the number of sites requiring pre-emergent applications. This year we also continued with our second application of bark banding product which has allowed us to discontinue our large overhead foliar spray program for olive fruit suppression.

C.9.c ► Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.

19

Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.

Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.

100%

C.9.d ► Require Contractors to Implement IPM

Did your municipality contract with any pesticide service provider in the reporting year? X Yes No

If yes, attach one of the following:

- | |
|---|
| Contract specifications that require adherence to your IPM policy and standard operating procedures, OR |
| Copy(ies) of the contractors' IPM certification(s) or equivalent, OR |
| Equivalent documentation. |

If not attached, explain:

Animal Damage Management provides gopher/mole control for the Parkways and Boulevards Division. They follow all standard IPM procedures, but do not have a formal certification or policy. We will review our current contract and require adherence to all City IPM policies for future contracts.

**City of Santa Clara
Integrated Pest Management
Policy**

The City of Santa Clara has adopted the following policy and procedures that follow the guidelines of an Integrated Pest Management Program (IPM). The City of Santa Clara IPM program shall use current comprehensive information on the life cycles of pests and their interactions with the environment. This information, in combination with available pest control methods, shall be used to manage pest damage by the most economical means, with the least possible hazard to people, property and the environment. The Santa Clara IPM program will utilize all pest management options possibly including, but not limited to, the judicious use of pesticides.

The City shall take a proactive approach in implementing IPM procedures in accordance with this policy. The City will direct its employees and contractors to use IPM tools to prevent pests (weeds, insects and fungi) from developing or worsening. These choices of control use the right tool, at the right time, and the right way. The ultimate goal is to minimize the amount of chemicals used to control pests.

Contractors hired by the City of Santa Clara to provide pest control work, must adhere to all policy and procedures set forth in their IPM program.

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

The Countywide Household Hazardous Waste Program (CoHHWP) served 34,629 residents and 432 small businesses at 60 collection events in FY 09-10. Residents are able to dispose of mercury containing devices at all collection events. The CoHHWP has 34 fluorescent lamp and 67 household battery local retail recycling partners that accept mercury containing devices at no charge. The City provides single-family curbside collection of CFL's and household batteries through its solid waste collection program. Elemental Mercury: 580 pounds

The methodologies for estimating the mass of mercury collected through mercury collection and recycling efforts has been made using the new conversion factor established by CalRecycle in 2009; 1 foot = 0.125 pounds and one CFL = 0.25 pounds.

271 pounds of CFL's and 6,800 pounds of household batteries were collected from single-family homes through the City's weekly curbside recycling program.

C.14.a ► Control Programs for PBDEs, Legacy Pesticides and Selenium Controls

Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."

Summary:

A summary of the Program's efforts (i.e., participation in RMP committee and work group meetings) to develop a control program for PBDE's, legacy pesticides and selenium is included within the C.14 PBDE, Legacy Pesticides, and Selenium section of the Program's Annual Report and the BASMAA Regional POC Report.

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

**C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges
of Potable Water**

Is your agency a water purveyor?	<input checked="" type="checkbox"/> X	Yes	<input type="checkbox"/>	No
If No , skip to C.15.b.vi.(2):				
If Yes , Complete the attached reporting tables or attach your own table with the same information. Describe program highlights below. For FY 09-10 only, describe steps taken to revise your program to meet new monitoring, data tracking and reporting requirements.				
<p>Summary:</p> <p>For FY 09-10 our utility has revised program by documenting both planned and unplanned discharges, conducting water quality monitoring including chlorine residual, pH, discharge turbidity, implementing revised best management practices (BMP's) and correction actions including sediment control, chlorine control, turbidity control and chemical additives. A summary of the programs efforts to update the Water Utility Operations & Maintenance Discharge Pollution Prevention Plan (WUDPPP) to assist municipal water purveyors in complying with this provision of the MRP is included within the C.15 Exempted and Conditionally Exempted Discharges section of the Programs FY 09-10 Annual Report.</p>				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation.
Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

Promote conservation programs: The city of Santa Clara promotes conservation programs by educating the community about methods of conserving water. Additionally, the City coordinates with the Santa Clara Valley Water District for rebate programs for both indoor and outdoor water conservation. The City is currently expanding the recycled water mains and promoting the use of recycled water to save potable water for other and future uses.

Promote outreach for less toxic pest control and landscape management: City staff is proactive when finding or being informed about irrigation leaks or runoff and contact residents directly to educate them about efficient landscape management. The City coordinates with the Santa Clara Valley Water District to perform irrigation audits and provide rebates for water conserving irrigation. Additionally, the City's Recycled Water Program promotes landscape management and water conservation.

Promote use of drought tolerant and native vegetation: The City promotes the use of drought tolerant and native vegetation through landscape displays that City staff present at City sponsored events. Additionally, the City coordinates with the Santa Clara Valley Water District for landscape audits and rebate programs, which specifically require drought tolerant and recommend native vegetation planting materials.

Promote outreach messages to encourage appropriate watering/irrigation practices: City staff directly contact residents that are found to be, or reported to be, overwatering or running irrigation systems with broken sprinklers. City staff is drafting a water efficient landscape ordinance for residential, commercial and industrial properties. City staff works with recycled water customers to ensure that their irrigation systems are in proper working order. The City coordinates with the Santa Clara Valley Water District on irrigation audits and rebate programs to encourage efficient, water conserving irrigation.

Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff: When City staff learn about ongoing, large volume landscape irrigation runoff, staff contact and work directly with property owners and property managers to educate them about water conservation and require that these irrigation problems are corrected in a timely manner.

For outreach for less toxic pest control and appropriate irrigation practices, refer to the Watershed Watch Campaign in the C.7 Public Information and Outreach section and the IPM Store Partnership and Green Gardener Training Programs in the C.9. Pesticide Toxicity Control section of Programs FY 09-10 Annual Report.
